**IF YOU HAVEN'T
ALREADY - CHECK OUT
OUR EXPLAINER VIDEO!**

So, what are the issues with the way companies engineer, source and procure materials today?

Do you use emails to engage and communicate with suppliers?

Poor visibility
High volume of emails
Poor traceability
Difficult to effectively compare bids

**How do you know who your best suppliers are?
Are you completing any analysis?**

Data under utilised
Little or zero insight into suppliers strengths & weaknesses

Can you put your hands on your last 6 months of bids, technical queries & approvals?

Important documents, approvals, & communications stored in emails - which can't be used for analytics & are easily lost

How much single sourcing is done because you don't have time?

With everyone too busy and the process so inefficient many companies are single sourcing, an expensive way to operate
